Our school has participated in several Family Portrait sessions with 'Personalised Portraits' over the past 5 years and all have been very successful in terms of Fundraising.

Sessions are conducted at school after hours or on a weekend when families can attend at a time which is convenient to their busy lives.

Vikki of Personalised Portraits is a vibrant and enthusiastic photographer who is always professional in her approach, able to put clients at ease and quickly soothe any nerves on the part of her clients or their children.

The pricing of the full package is competitive and of course the finished portraits are of a high standard in their presentation.

Now that the company has gone digital and with the purchase of the full package, clients are able to take away a CD which contains all prints. Personalised Portraits will give away Copyright (almost unheard of in this business!) with the purchase of the full package.

We will continue our association with Vikki of Personalised Portraits into the future.
